

This DVD is a re-release of some of the classic videos supplied originally on the IACLE VHS video tapes (101 to 103).

The materials were sourced originally from Visual Eyes of the US with sponsorship from the CLMA, the RGPLI, or Nikon Inc.

It has become necessary to re-release some of these key videos because some institutions have literally worn out their video tapes.

Because video recorders have been largely displaced by DVD players and the life expectancy of DVD disks is greater, IACLE will no longer be distributing VHS tapes.

The IACLE Video Library DVD Edition is a Region 0 encoded recording (plays anywhere in the world) and is available in either PAL or NTSC versions only.
